

# True Potential TrinityBridge Balanced

31 July 2026

## Fund objective

The Fund aims to generate capital growth with some income.

## July Update

Global equities were broadly flat in July amid an escalation in US-Iran tensions and significant declines in semiconductor stocks. Emerging Market (EM) equities fell and underperformed their developed market counterparts, dragged down by South Korea and Taiwan. In developed markets, UK and European shares outperformed, while US growth-style stocks proved a laggard. In fixed income, global sovereign bonds underperformed as yields rose. Elsewhere, gold prices ended broadly flat.

The True Potential TrinityBridge Balanced Fund returned -3.79% (net of fees). The Fund's large allocation to US equities proved detrimental, as did exposure to growth and momentum-style shares. The Fund's sizeable allocation to semiconductor names weighed on returns, with KLA Corporation, Lam Research and Taiwan Semiconductor Manufacturing Company posting sharp declines over the month. Conversely, the key contributors included US technology names Amazon and Microsoft, along with British aerospace and defence company BAE Systems. In fixed income, the Fund's allocation to longer-dated UK Gilts and US Treasuries detracted the most as yields edged higher. In alternatives, the Fund's exposure to gold also hindered returns.

## Growth of £10,000 invested 5 years ago

## Why invest in this fund?

- For investors looking to invest for the long term (5 years or more).
- Diversifies risk by investing in stocks and bonds.
- The balanced approach of the fund strives to provide both growth and income, while managing short-term losses through a diversified mix of assets that moderate risk.

## What is the benchmark for this fund?

The benchmark for this fund is Morningstar UK Moderate Target Allocation. The benchmark may be used as a guide to compare and assess the performance of the Fund. This benchmark tracks the performance of an index that represents assets or securities with a similar risk profile to the Fund. Our aim is to help you monitor how your investment is performing. This benchmark reflects the multi-asset nature and relative risk profile of the Fund. The Fund does not use the benchmark as a target, nor is the Fund constrained by it. The mix of assets in the Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

## Key fund information

**Accumulation shares:** this type of share reinvests the income generated by its underlying assets (such as dividends or interest) back into the fund, rather than paying it out to shareholders as income.

**Income shares:** this type of share pays out the income generated by the fund's underlying assets (such as dividends or interest) directly to investors, rather than reinvesting it back into the fund.

\* The 12 month yield reflects distributions declared over the past 12 months, as a percentage of the latest share/unit price. Investors may be subject to tax on their distributions. Yield as at 31 Jul 2026. Source: True Potential Administration LLP.

\*\*OCF payable can fluctuate over time as the underlying investments are variable and can change. The OCF figure is sourced from the Key Investor Information Document (KIID) dated 16 Feb 2026 found at [www.truepotential.co.uk/fund-documents](http://www.truepotential.co.uk/fund-documents).

## Who is this fund suitable for?

This fund is suitable for all investors under the advice of a professional adviser, or investing through the True Potential Portfolios. The minimum recommended holding period is 5 years. Please be aware there is no guarantee that the fund will meet its investment objectives. The Fund is available to those that do not need a capital guarantee and are aware that their capital is at risk. Clients who are unable to bear loss of capital should not invest in this Fund.

## What are the fees associated with investing in this fund?

The OCF of this fund is currently 0.69%. This means that if you invest £1000 in the fund, you can expect to pay £6.90 in fees over the course of a year. The fees you pay are pro-rata. If you hold the fund for less than a year you will only pay the proportional amount of fees applicable (based on the duration of your investment).

## Risks

The following are some of the key risks associated with investing in this Fund. For a complete list of risks, please refer to the Fund's prospectus, available at [www.truepotential.co.uk/fund-documents](http://www.truepotential.co.uk/fund-documents). **Please be aware that there is no guarantee that capital will be preserved.**

| Risk type          | Description                                                                                                                                                                                                                                                                                                                |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Performance Risk   | Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro-economic environment, certain investment types and styles may perform better than others and investment objectives may become more difficult to achieve.      |
| Counterparty Risk  | There may be cases where the organisation from which we buy a derivative, or an asset, fails to meet its obligations. The Fund's cash deposits are also subject to counterparty risk.                                                                                                                                      |
| Derivative Risk    | The Fund is entitled to use derivatives. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid.                                                                                 |
| Operational Risk   | The Fund faces non-market risk, relating to purchasing, holding and servicing the Fund's assets.                                                                                                                                                                                                                           |
| Credit Risk        | Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value. This risk is particularly relevant where the fund invests in bonds with a lower credit rating. |
| Exchange Rate Risk | The Fund may invest in securities not denominated in GBP. The value of your investments may be affected by changes in currency exchange rates.                                                                                                                                                                             |
| Liquidity Risk     | Certain market conditions could make sufficiently liquid assets difficult to sell quickly at a fair price. This could result in an unpredictable fall in the value, and overall liquidity of the Fund.                                                                                                                     |
